The evidence is now overwhelming for the efficacy and safety of hydroxychloroquine (HCQ) with azithromycin and zinc. Here are possible motives for denying doctors the right to prescribe HCQ for willing COVID-19 patients:

- Hatred of US President Donald Trump
- Hatred of philanthropist Clive Palmer
- Desire to kill off the elderly and feeble
- Brutally sociopathic authoritarianism
- Political or financial gain from vaccine sales

THE PEOPLE'S PRESCRIPTION

At a Family & Children's Rights Association (FACRA) rally in Perth's Stirling Gardens on Sat 12 Sep 2010, addressed by WA opinion leaders including Prof Augusto Zimmerman, Dr Mark Imesidis, Clint Taylor, Vicki Victoria, Tshung Chang, Megan Brickell and Travis Carter, more than 200 persons voted unanimously for these resolutions:

- Highest priority must be given to kind and compassionate protection of elderly, disabled, disadvantaged and high-risk Australians.
- Doctors may prescribe for their patients in line with the Declaration of Geneva.
- All bans on hydroxychloroquine must be removed.
- There must be no compulsory vaccination, no right of enquiry about an individual's COVID vaccination status and no discrimination on the ground of vaccination status.
- Pharmaceutical companies must be liable in damages for any and all harm caused by their products, with particular reference to vaccines.
- Each vaccine supplier must lodge 30% of its total revenue from Australian sale of a vaccine, as a bond from which claims may be paid. After five years the unused portion of the bond will be repaid at the rate of 3% per year.
- We require cessation and reversal of all attempts to use the COVID-19 pandemic to expand governmental power over the lives of citizens.
- There must be no additional restriction on the use of cash.
- The ban on Australians travelling abroad must be removed.
- Section 92 of the Constitution is to be respected, noting that State Governments have the power to restrict intra-state travel.
- Australia must quit the World Health Organisation and the United Nations.

NARRATIVE

TRUTH CAN NO LONGER BE HIDDEN. Australians, especially elderly Australians, have died needlessly, victims of shockingly wrong policies banning or discouraging useful, harmless treatments for the COVID -19 Virus.

On 4 April 2020 Taiwan authorities announced their recommendation for treatment of COVID-19: Hydroxychloroquine (200 mg thrice daily) plus azithromycin (500 mg on day 1, followed by 250 mg once daily on day 2-5), with zinc supplement. There have been seven deaths attributed to COVID-19 in Taiwan, a country around half the size of Tasmania and with population similar numerically to Australia, which has had 893 deaths as at 3/10/2020.

Also on 4 April 2020, Dr Kylie Wagstaff, Monash Biomedicine Discovery Institute reported an Australian-led study has shown that a single dose of an anti-parasitic drug, Ivermectin, could essentially remove all genetic material of the COVID-19 virus within 48 hours.

That was the time, six months ago, when the Prime Minister should have confirmed that Australian doctors have the right to prescribe for their patients, consistent with the Declaration of Geneva (the “Modern Hippocratic Oath”) which contains these pledges:

- I WILL NOT PERMIT considerations of age, disease or disability, creed, ethnic origin, gender, nationality, political affiliation, race, sexual orientation, social standing or any other factor to intervene between my duty and my patient;
- I WILL MAINTAIN the utmost respect for human life;
- I WILL NOT USE my medical knowledge to violate human rights and civil liberties, even under threat;

Instead the Prime Minister and his [Angkar/Ingsoc](#) fake National Cabinet **BULLIED** medical practitioners to reject these solemn pledges (above) and turn their backs on their patients.

In jurisdictions where hydroxychloroquine and other valid treatments are banned, thousands of mainly elderly and frail individuals are dying unnecessarily, as human sacrifices to the greed of Gates and Big Pharma. Politicians owned by Big Pharma have smashed the sanctity of the relationship between patient and doctor by falsely insisting that the only defence against COVID-19 is a vaccine. So determined are these politicians to obey their financial masters, they even indemnify Big Pharma against damages claims for harm done by any potential vaccine. This wicked policy is appalling and indefensible, because it removes all incentive for Big Pharma to make vaccines safe. How many more elderly folk must be condemned to suffering and death to protect the intended gargantuan profits of Gates and Big Pharma? How long can Australia’s public broadcaster continue pushing the lying assertion that HCQ “does not work”?

Vicious opponents of President Trump have been deliberately intensifying and exacerbating the harm done by COVID-19 in the hope of removing from office the president they hate. Their methods include promoting fraudulent studies, and denigrating, humiliating and persecuting each medically qualified person who attests to the efficacy of HCQ. Shame on them all. Shame and disgrace for Australian politicians who in banning a safe treatment for whatever reason, have condemned elderly Australians to pain, suffering and death. **You will not be forgiven.**

195.	22/08/2005	<p>Virology Journal (Centres for Disease Control led by Dr A. Fauchi) chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage. In addition to the well-known functions of chloroquine such as elevations of endosomal pH, the drug appears to interfere with terminal glycosylation of the cellular receptor, angiotensin-converting enzyme 2. This may negatively influence the virus-receptor binding and abrogate the infection, with further ramifications by the elevation of vesicular pH, resulting in the inhibition of infection and spread of SARS CoV at clinically admissible concentrations. Conclusion: Chloroquine is effective in preventing the spread of SARS CoV in cell culture. Favourable inhibition of virus spread was observed when the cells were either treated with chloroquine prior to or after SARS CoV infection. In addition, the indirect immunofluorescence assay described herein represents a simple and rapid method for screening SARS-CoV antiviral compounds.</p>	LINK

We are not like that. We know that no one ever seizes power with the intention of relinquishing it. Power is not a means; it is an end. One does not establish a dictatorship in order to safeguard a revolution; one makes the revolution in order to establish the dictatorship. The object of persecution is persecution.
